

Intelligence without Exposure

A Technical Briefing for School Administration | VeloxSync Education — Powered by Ei-Core™

I. Core Objective

- VeloxSync is a Classroom Intelligence Layer designed to automate the administrative burden of TEKS/IEP compliance while providing real-time instructional grouping.
- Built on the ****Ei-Core™**** engine — a sovereign architecture that prioritizes student privacy and district data ownership.
- Returns 10+ hours per week to teachers by automating manual data tracking.

II. Administrative Alignment

- **Standard Rigor:** Native mapping to Texas TEKS (Knowledge & Skills / Student Expectations).
- **Compliance Automation:** Real-time verification of IEP/504 accommodations, reducing district liability.
- **Instructional Velocity:** Automated small-group recommendations based on data-backed Signal Intelligence.

III. Security & Privacy

- **FERPA/COPPA Compliant:** We act as a School Official under direct district control.
- **Zero-Retention Policy:** Student data is processed in real-time and never used to train public AI models.
- **Sovereign Residency:** Data is encrypted and housed in private, secure instances. No third-party data sharing.
- **CISSP Oversight:** Security protocols designed and audited by a Certified Information Systems Security Professional.

IV. The Bottom Line

- VeloxSync returns 10+ hours per week to the teacher by automating manual data tracking.
- Allows for more direct student-teacher interaction and personalized instruction.
- Designed for the classroom — not adapted from a corporate HR tool.
- Pilot-ready: 7-day free trial, no credit card, zero IT configuration required.

"We don't just provide a tool; we provide a secured perimeter for instruction."

Non-Training Clause

User data processed via the Ei-Core™ engine is used solely for real-time signal generation and is never retained for the purpose of training large language models or third-party algorithms.
